Date	Location	Course	Description	Cost
September 12th - 15th, 2017	T&H Commack, NY	CCP153 ID 18400	ControlLogix Maintenance and Troubleshooting Upon completion of this course, you will be able to troubleshoot a previously operational ControlLogix system and restore normal operation.	\$2,090
September 18th - 22nd, 2017	T&H Commack, NY	CCP299 ID 18496	ControlLogix Fundamentals and Troubleshooting This course is intended for individuals who need to maintain and troubleshoot a ControlLogix system—but have no current working experience. Upon completion of this course, you will be able to troubleshoot a previously operational ControlLogix system and restore it to normal operation.	\$2,475
September 25th - 29th, 2017	T&H Linden, NJ	IMINS ID 22677	Managing Industrial Networks with Cisco Networking Technologies A lab-based course which helps students with the foundational skills needed for the management and administration of networked industrial control systems. The IMINS course, developed in conjunction with Rockwell Automation, helps plant administrators, control system engineers and traditional network engineers understand networking technologies that are needed in today's connected plants and enterprises.	\$3,420
October 24th - 25th, 2017	T&H Commack, NY	CCP146 ID 24465	ControlLogix System Fundamentals Assist in developing and building a solid foundation with a fundamental knowledge of ControlLogix® and other Logix5000™ systems. Students will be introduced to basic Logix5000 concepts and terminology, Logix5000 system hardware and hands-on experience with the ControlLogix platform.	\$1,274
October 24th - 25th, 2017	T&H Linden, NJ	CCP146 ID 24460	ControlLogix System Fundamentals Assist in developing and building a solid foundation with a fundamental knowledge of ControlLogix® and other Logix5000™ systems. Students will be introduced to basic Logix5000 concepts and terminology, Logix5000 system hardware and hands-on experience with the ControlLogix platform.	\$1,274
October 26th - 27th, 2017	T&H Commack, NY	CCCL21 ID 24384	Basic Ladder Logic Interpretation This course provides you with a more detailed understanding of Studio 5000 Logix Designer ladder logic instructions and terminology. You will have the opportunity to use the Logix Designer to perform basic software tasks to meet the requirements of a given functional specification. You will also be introduced to ladder logic techniques, established standards, and common rules for interpreting ladder logic.	\$1,274
